

Dear Master of Data science course administration!

Recently, 21st of July 2021, I missed a strong deadline for Staff Graded Assignment 5 "Hypothesis testing meets confidence interval".

It happened because I had a vacation in another country, and due to some difficulties (long flight, bad internet connection in my hotel, and also climate adaptation) I was overdue by 1 hour and 4 minutes.

Finally, I wrote a letter to MDS course support about the possibility to still submit my solution, and got a confirmation from Konstantin Tikhonov, statistics course teaching mentor.

He suggested that I could submit my solution with a final penalty of 20%.

Please provide Konstantin Tikhonov a permission to verify my work and score it.

Statistics course is not the easiest one, thus any opportunity to improve final mark is highly needed.

Nikolai Petrov,

MDS-program student, Fall 2020 cohort
